

Exchange of Ideas: Research Situation concerning CS education in Switzerland

@ WiPSCE 2022 The 17th Workshop in Primary and Secondary Computing Education

November 2nd, 2022 | Morschach | <https://www.wipsce.org/2022/>

We invite researchers in Computing Education in Switzerland to participate in an exchange of ideas on the research situation in Switzerland during the "17th Workshop in Primary and Secondary Computing Education". This exchange will take the form of a free workshop in the afternoon of the last day of the conference. The aim of the workshop is, among other things, to answer the following questions:

- What are the specific research needs in the field of Computing Education?
- Which of these research needs lack adequate financial resources and research programs?
- What might a research program look like that addresses these needs?

The results of the workshop will be made available to the Hasler Foundation in the form of a white paper. We will soon publish registration information on the conference website.

PLACE

Mattli Antoniushaus
Seminar- und Bildungszentrum
Mattlistrasse 10
CH-6443 Morschach
